|---|---|
| (1) GU-1305-7-LO4414 [Powerliter-W.Iron-LO4414]     | (1) GD-1409CU-LO93 [Footliter Copper-LO93]              |
| (1) Pro-Series Extruded Aluminum MR-16 Fixture Body | (1) Sample String Of Specialty String Lights            |
| (3) MR-16 Lamps: LO4208, LO5024, LO2036             | (2) PAR-36 Lamps: LO7616, LO25WFL                       |
| (3) Wedge-Base Lamps: LO912, LO921, LO904           | (4) Single-Contact Lamps: LO89, LO93,<br>LO1156, LO1195 |
| (1) BC-0603-C [12-Volt 7 Amp/Hr Battery w/Charger]  | (1) Conduit Mount Example                               |
| (1) 120V Candelabra Adapter                         | (1) 6' Quick-Connect Demo-Cable                         |
| (1) 20' Quick-Connect Demo-Cable                    |   |

All fixtures and lamps come equipped with quick-connect banana plugs for quick connections. All packed conveniently in a Vinyl Display Case.

## Outdoor Demo Web:

DEMO-SMITH The Demo-Smith (Web) is a demonstration hub dependent on a single 12-Volt battery power source. With the Demo-Smith you can precisely place and subsequently demonstrate multiple fixtures of your choice throughout a potential client's landscape. Quick-Connect banana plugs literally make the set-up "quick". The master control panel allows you to turn the individual Nightscaping® fixture you have placed in the landscape on or off from a centralized location.

## MR-16 Lamp Display:

DEMO MR-16 The MR-16 Lamp Display comes equipped with 9 different MR-16 lamps: LO2006, LO2012, LO2036, LO3512, LO3540, LO4208, LO5012, LO5024, LO5055. Each lamp is switched with a momentary contact switch to prevent the possibility of over loading the power supply. The display unit comes standard with a 4' 12-Volt power cord.

## Tree Demonstrator:

DEMO TD-16 The Tree Demonstrator holds an MR-16 lamp, a PAR-36 lamp and the hanging fixture of choice (Lamps and hanging fixture sold separately). The Tree Demonstrator will attach to a fiberglass telescopic utility pole (Pole sold separately). The Tree Demo Kit allows for SAFE down lighting demonstration by keeping the users feet safely on the ground. (Beware of High-Voltage Cables!!)

## Troubleshooting Equipment:

BC-0603 12V Battery and Charger. The 7-amp/hr battery, when fully charged will power a 50W lamp for approximately 2 full hours. Regular maintenance on the battery is essential for dependable long-life. Let the battery discharge fully before recharging. Do Not Over Charge - 12 hours max. Comes standard with the 4-B Battery Demo and the '99 Contractor Demo.

AM-0601 The Digital Amp-Probe is an essential tool for accurately installing and troubleshooting Nightscaping® professional lighting systems. The Amp-Probe enables you to accurately know total wattage on a run.

VM-0203 The Digital Volt-OHM Meter is also an essential tool for the lighting specialist. It accurately test the voltage, continuity, and ohms resistance in Nightscaping® professional lighting designs and installations.
