

# GARDEN GRAPHICS DynaSCAPE<sup>3</sup>

OUTDOOR LIGHTING Edition

BY *Nightscaping*

## [ features ]

- A Nightscaping® Application
- 2-D Drafting Tool
- Advanced CAD Functionality
- Outdoor Lighting Specific Symbols
- Outdoor Lighting Specific Layers
- Nightscaping® Raster Images
- Built In Voltage Calculator
- Automated Labeling
- Automated Material Take Off
- Quotation Module
- Manage Customers, Materials, etc
- Download Material Updates
- Export to Word and Excel
- Multi Media Training Video

Garden Graphics has partnered with Nightscaping® to bring the outdoor lighting industry a product that can increase efficiency, market share, and level of professional presentations.

The DynaSCAPE<sup>3</sup> - Night Lighting Edition™ combines a 2D drafting tool with a quotation module that allows the user to design and quote a outdoor lighting project in a quick and simple process.

Nightscaping® clients using Garden Graphics technology will be at an obvious advantage to their competition because of the ability to accelerate the drawing and quotation process with a higher level of perceived value in the marketplace.

**OUTDOOR LIGHTING** Edition

In 1959 Nightscaping® started manufacturing lighting fixtures for the outdoor lighting industry. I have always thought of these fixtures as "tools" for the professional contractor. These tools have increased in number, quality, and complexity, while continuing to do one thing; help the professional contractor or designer achieve beautiful results while making a profit.

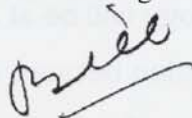

I am pleased to introduce another tool geared towards that same end, DynaSCAPE3™ - Outdoor Lighting Edition. This CAD based software program is the result of a partnership with Garden Graphics. It is an entry level program geared towards the beginner with many features found in more expensive and complex programs. It is able to interact with ALL current CAD based programs now in vogue. The program allows the beginner or expert to:

- Design professional looking, easy to follow plans
- Employ Nightscaping® specific symbols and legends
- Generate virtually instant estimates and stock lists at the touch of a button
- Calculate voltage drops with built in calculators
- Create multiple layers to show color coded wire runs
- Store and build client histories with a built in customer management module
- E-mail files for full size drawings with built in print drivers for Kinkos stores

The DynaSCAPE3™ - Outdoor Lighting Edition will maximize your design efficiency and save you hours at the drafting table. I am confident that this will be a valuable tool in your Nightscaping® toolbox.
